

Population Health Innovations has been providing platforms that manage sensitive health data for over 15 years. We've hosted over 10 million electronic health records and developed SurelySafe to provide tracking of Covid-19 daily symptom screenings, positive cases, diagnoses, and exposure incidents.

To ensure compliance with the new OSHA mandate, we offer the services outlined under an all-inclusive solution to assist Human Resources, Compliance, and Safety teams thoroughly record their employee vaccinations and weekly tests.

SurelySafe is designed to adapt with your evolving workforce. By providing us with an HRIS employee export, we can automatically match your internal systems with SurelySafe to ensure records are updated continuously with your workforce changes.

Setup, training, and ongoing support is all included in our simple, monthly pricing.

### SurelySafe Admin Daily Log

SurelySafe allows Human Resources admins to screen employees directly in the interface or by providing employees self-reporting links. Self-reporting links can be used online in any browser or by downloading the SurelySafe app on either iOS or Android mobile devices. Self-screening enables employees to "certify" their daily symptoms, Covid-19 exposures, test results, and vaccination status. Admins can run a variety of reports on employees vaccinated/not vaccinated, tested/not tested, positive case tracking, and exposures, to name a few.

The screenshot displays the SurelySafe Admin interface. At the top, there is a navigation bar with the SurelySafe logo and menu items: Individual Encounters, COVID-19, Reports, Administration, and Resources. Below this, there are two main panels. The left panel, titled 'Employee List', contains a search bar and a table with columns for 'Last', 'First', and 'All Departments'. The right panel, titled 'Today's Log', contains a search bar and a table with columns for 'Last', 'First', 'Department', 'In', 'Out', 'Disposition', and 'Self'. Both tables list employee names and their associated departments and log entries.

Last	First	Department	In	Out	Disposition	Self
Buchanan	Alan	CLINICAL	10:19 AM	10:19 AM	RW	Yes
Capitano	Juliet	HEALTH & SAFETY	10:19 AM	10:19 AM	RH	Yes
Clock	William	HEALTH & SAFETY	10:19 AM	10:19 AM	RW	Yes
Boldwood	James	HEALTH & SAFETY	10:18 AM	10:18 AM	RW	Yes
Bovary	Sally	OPERATIONS	10:18 AM	10:18 AM	RW	Yes

## SurelySafe Contact Tracing

SurelySafe Contact Tracing automates positive case quarantine dates and possible exposures, with the ability to fully trace where a positive occurrence may have exposed others. Options to manually “clear” employees who later test negative exist so Human Resources can customize quarantine dates according to their company policy.

## SurelySafe Weekly Covid-19 Testing

Human Resources and/or employees can submit weekly Covid-19 testing dates and results. A negative test will “clear” them for entry while a positive test automatically adjusts their status to “quarantine.” In any positive case, the SurelySafe Contact Tracing module can be used to alert other employees who may have been exposed. Weekly reminders in the app alert employees they are due for testing at 7-day intervals and reports allow administrators to easily track any overdue test for an employee.

**COVID-19 Weekly Test**

Lab Name: GS Labs

Test Time: 10/06/2021 09:00 AM Result: Negative

Notes: [Text Area]

Attachment: GS LABS TESTING - result.pdf

 Wendy Golias has been tested on Oct 6, 2021 10:00 AM and reported negative.  
DATE TIME: OCTOBER 15, 2021 09:29 AM

 Jessica Alden has been tested on Oct 8, 2021 03:10 PM and reported positive.

### SurelySafe Vaccination Recording

Human Resources or employees can record the dates and types of Covid-19 vaccine(s) they receive. Employees can take a photo of their vaccination card from their phone and administrators can submit this information from the SurelySafe admin interface. To ensure compliance, Human Resources will open the vaccination card photo, verify its accuracy, and mark an employee as “approved.” Those who are fully “approved” will not be required to partake in weekly mandated testing.

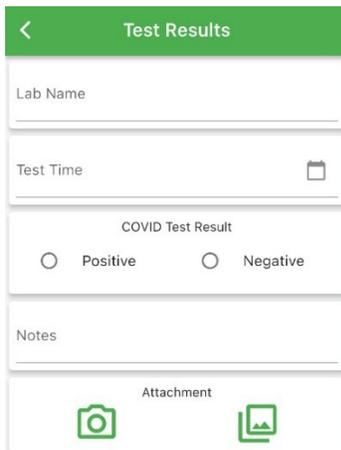

Submit Date	Employee ID	Last	First	Department	Vaccine Type	Vaccine Date	Status	Edit
10-13-2021	45737	Karenina	Carol	CUSTOMER SERVICE	J&J	07-01-2021	Approved

10-13-2021	45368	Osmond	Peter	CUSTOMER SERVICE	Pfizer	07-21-2021	Pending	
10-13-2021	45368	Osmond	Peter	CUSTOMER SERVICE	Pfizer	06-01-2021	Pending	

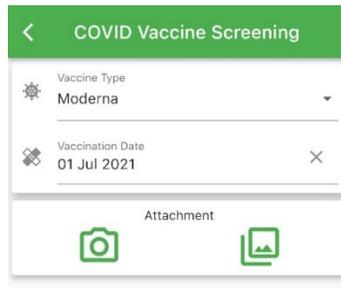

### SurelySafe Self-reporting Links Via App on Google Play or Apple Store

Employees are each issued a secure, self-identifying link to use via a browser or within the SurelySafe app available for Android and iOS devices. The self-reporting app allows employees to enter their vaccination dates and cards, weekly test results and documentation, along with daily Covid-19 screening for symptoms, diagnoses, or exposures. Any positive Covid-19 test or diagnosis will alert the employee they are not “cleared” for in-person work and the data is viewable in the Contact Tracing module.
